2. Aircraft		
	an aircraft was observed circling	25 X 1
above naval vessels numbers 30 a	and 22 mentioned above. The plane	
circled the source's ship once,	and disappeared in the direction of land.	
Description: Seaplane with wir	ngtip floats, twin engines, high wings,	
twin siderudders.		
3. Merchant vessels		
	a tanker was seen in position 69 42' N -	25 X 1
33°44' E. The vessel was steer	ing a course about 317° true. The tanker	
was of about 14,000 tons, and ap	pparently in ballast.

1. Navy three very large naval vessels were observed in positions 69°26' N - 34°51' E, 69°24' N - 34°48' E, and 69°26' N - 34°51' E. The vessels were proceeding at a speed of 20 miles on a course about 290° true. Formation: starboard flank. Observation distance about nine miles. Later, the vessels changed course several times, but maintained the same formation. The vessels were of two types: Description, type 1: Estimated length 700 feet, two funnels, tripod masts immediately forward of each funnel, very large bridge structure. Armananir not observed, but at least one gun turret on foredeck and one on afterdeck. Break from foredeck, probably amidships. Distance between funnels about one sixth or one seventh of the length of the vessel. (See sketch no. 1). Description, type 2: There were two vessels of this type, apparently identical. Length somewhat greater than that of type 1. Funnels, masts, superstructure, and gun turrets as in the type 1, no break from foredeck observed, but several steps aft. The length of the vessel was about 30 times the height of the forward superstructure. (See sketch no 2). No other vessels seen in the vicinity, but an airplane circled for 25 minutes	ATTACHMENT # :		25X

Description, type 2: There were two vessels of this type, apparently identical. Length somewhat greater than that of type 1. Funnels, masts, superstructure, and gun turrets as in type 1, no break from foredeck observed, but several steps aft. The length of the vessel was about 30 times the height of the forward superstructure. (See sketch no 2). No other vessels seen in the vicinity, but an airplane circled 25 for 25 minutes 25	vessel. (See	sketch no. 1).
